SMART AFRICA EOI · CONTROLLED SYNTHETIC DEMONSTRATOR

Transaction Assessment — FINC-INSUFFICIENT_METADATA-005

Detailed governed assessment report for FinTech C / Insufficient Metadata.

TRANSACTION	INSTITUTION	RISK	RECOMMENDATION
FINC-INSUFFICIENT_METADATA-005	FinTech C	CRITICAL	REJECT

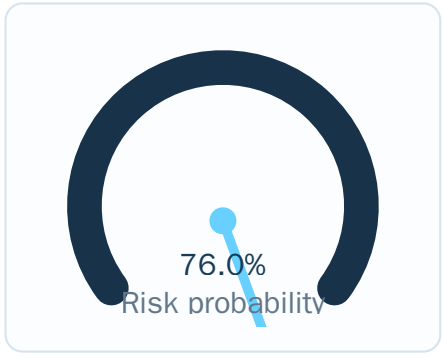

1. Assessment identity

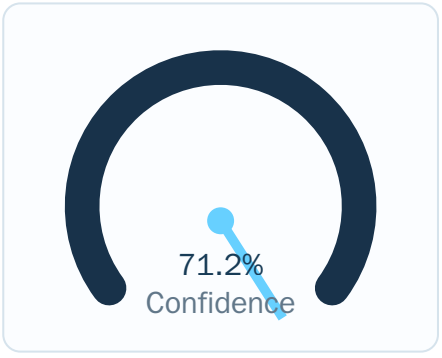

TRANSACTION	INSTITUTION	SCENARIO
FINC-INSUFFICIENT_METADATA-005	**FinTech C**	**Insufficient Metadata**

RECOMMENDATION
REJECT

2. AI trust assessment

Risk category	CRITICAL	**Model version**	TRUST-BASELINE-0.1.0
SDK version	EOI-DEMO-1.0	**Policy version**	1.0.0-DEMO
Latency	— ms	**Audit reference**	AUDIT-FINC-INSUFFICIENT-METADATA-005

3. Feature & context evidence

{}

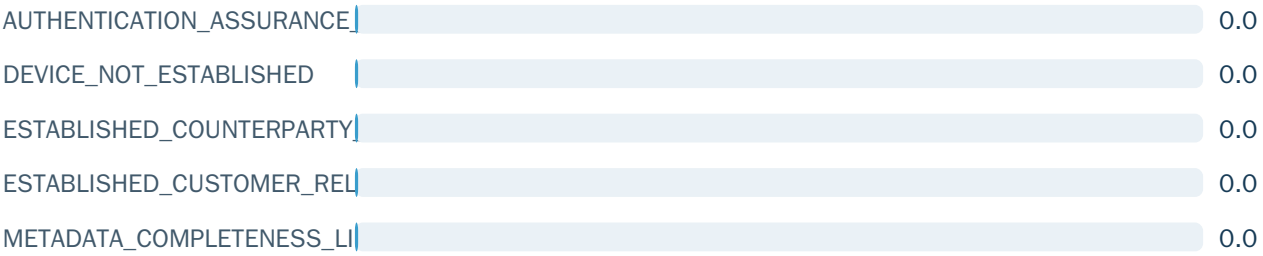

4. Explainability evidence

Reason codes

Feature contributions

Relative feature contribution magnitude

Human-readable explanation

The model produced risk category CRITICAL, trust score 24.05, and confidence score 0.7125. The principal model factors increasing modeled risk were: Limited authentication assurance, Device relationship not established, Limited metadata completeness. The principal model factors reducing modeled risk were: Established customer relationship, Established counterparty relationship. This explanation describes model evidence only and does not constitute an institutional transaction decision.

5. Policy interpretation

Advisory recommendation: REJECT
Policy is reported separately from AI inference.

6. Reconstructable evidence chain

Feature & Context → AI Trust → Explainability → Policy → Audit

7. Raw controlled assessment evidence

8. Interpretation and limitations

- Controlled synthetic demonstrator assessment.
- Recommendation is advisory only.
- Final transaction authority remains with the participating institution.

Demonstrator boundary. Generated from synthetic/controlled demonstrator evidence. TRUST provides an advisory assessment and policy recommendation; the participating institution retains final transaction decision authority. This document is not production certification.
